

MIXERS FOR PROCESSING SUGARED/SALTED OR OTHER VISCIOUS EGG PRODUCTS

Model HS-1500, (250 gallon) 1000Kg mixer/blender including the following specifications:

- Type 304 stainless steel construction
- All welds will be ground and polished.
- Single shell, non insulated
- 30 h.p. motor, 3 phase, 380 volt, 50 cycle **direct drive**

Model 10/20 series :

The **direct drive technology** forms the most important feature of the 10/20 series. A variable speed gear ensures there is the desired reduction factor with electric or pneumatic drives. This model is also equipped with remote control. If required.

The **flange model** mixers can be easily attached to the opening of the tanks
